Our Services

Breast Health Services

The Breast Health Clinic is staffed by breast specialists, including breast fellowship-trained surgeons and breast specialty advanced practice providers (ARNPs and PAs). To provide a diagnosis and treatment plan, our providers may incorporate the results of several exams:

- Clinical breast examination
- Mammography
- Breast ultrasound
- Skin punch and core needle breast biopsies
- Magnetic resonance imaging (MRI)
- Breast cancer personal risk calculation
- Breast cancer risk reduction strategies, including medication to lower one's risk of breast cancer.
- Referral to medical genetic counselor for genetic testing

The Breast Health Clinic provides prompt evaluation of abnormal mammograms, breast lumps, nipple discharge and other breast concerns. For people with an increased risk for breast cancer, the Breast Health Clinic staff provides an individualized screening and a follow-up plan to reduce one's risk of breast cancer and optimize early detection of breast cancer.

* Sees patients at SLU and NW locations

** Sees patients at NW location

What You Can Expect

- A clinical breast exam by an experienced clinician.
- Recommendation for a comprehensive individualized screening program.
- To discuss your breast imaging tests, such as mammography, ultrasound and MRI with your provider.
- When necessary, minor procedures such as breast or skin biopsies.
- Surgical consultation with a breast surgeon when appropriate
- Pre- and post-operative care for patients requiring breast surgery.
- Appropriate follow-up care directed by your provider.
- Referrals for genetic counseling and/or testing, as appropriate.
